

TRIDON FlexBlade™

The flexible high performance wiper blade

The Tridon FlexBlade is a new range of superior wiper blades with better wiping performance and clearer vision at high speeds. The Tridon FlexBlade range is available in 4 arm styles with colour coded packaging for easy identification between each style. Featuring aerodynamic flat profile design, direct replacement for vehicles fitted as O.E. and a hook upgrade programme for vehicles after 2000 the Tridon FlexBlade is truly the latest in wiper technology.

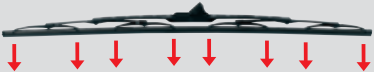

Tridon FlexBlade Advantages:

Even pressure distribution on the complete blade on the screen

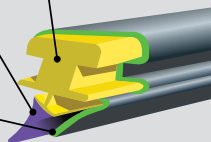

VS

Conventional steel blades with limited pressure points
(Blade pressure points determined by number of claws)

Advanced Rubber Technology:

- Synthetic Rubber Upper-body**
 - Resists permanent set deformity
 - Performs better in extreme hot/cold temperatures
 - Better rubber resists tearing
- Natural Rubber Wiping Edge**
 - Superior wipe quality
 - More flexible in cold temperature
- New Protective Coating**
 - Smoothing agent bonded to rubber
 - Will not rub off
 - Smoother and quieter wipe
 - Protects rubber from ozone, UV, fluids, oil and abrasion
 - Long lasting wipe
