Wera

The new Zyklop ratchet from WERA Germany

The specialist for fastening tools

Wera combines the advantages of five ratchet types in one tool!

- 1 fine tooth ratchet
- + 1 flex head ratchet
- + 1 angle ratchet
- + 1 nut fixing ratchet
- + 1 power ratchet
- + Can also be used as a screwdriver

Fast turning work

- Zyklop ratchets are really fast movers: the rotating mass design accelerates the screwdriving process.
- Think of a spinning top: simply give it a brief spin, and the top rotates on and on quickly and steadily.
- To secure the nut/screw at their final positions, switch over the lever and tighten the screw union as necessary.

Fast Connections

- The socket lock accelerates the work needed to attach and detach inserts and extensions.
- The ball lock secures both sockets and accessories for reliable and safe screwdriving work.
- A quick press on the release button, and tool changes are possible at all defined positions.

Not only for nuts!

- The Zyklop not only handles nuts and hex screws, it can also take a bit at 0° for use as a normal screwdriver.
- At the same time the typical Wera Kraftform handle provides a high transfer of forces, accelerates work, and is gentle on the palms.

Swivels by nature, if not by name!

- The ratchet features a swivelling head that can be released in any position. This means you can work easily even in cramped or awkward spaces.
- The defined locking points at 0°, 90° left and right, and 15°/90° inwards prevents the ratchet head from slipping for reliable work.
- The special feature: at the 0° position the ratchet can take a socket or the Zyklop bit holder and be used like a conventional screwdriver.

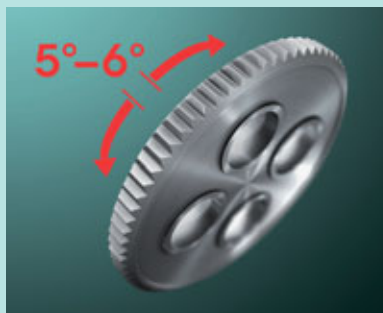

For all hands!

- The ratchet head presents an ergonomic design with finger recesses that respond perfectly to your hand and fingers for turning the head.
- The ratchet head lies snugly in your hand for fast work.

A perfect set of teeth!

- With fine-pitched teeth the reversible ratchet has a small backlash angle of 5° - 6°.
- The short stroke helps you take work quickly and precisely on all installation types – clockwise or anticlockwise.

Nice and handy

- The Kraftform handle has been designed to fit snugly in your hand, so blisters and callouses are a thing of the past.
- The hard materials promote fast applications and prevent the skin from “sticking”. The softer, “more antislip” zones facilitate the zero-loss transfer of high forces.

This combination is unbeatable!

Don't switch off - switch over!

- All Zyklop ratchets feature a thumbwheel that switches quickly and easily between clockwise and anticlockwise at any position. No awkward manipulation, no lost time!

The easy extension to work

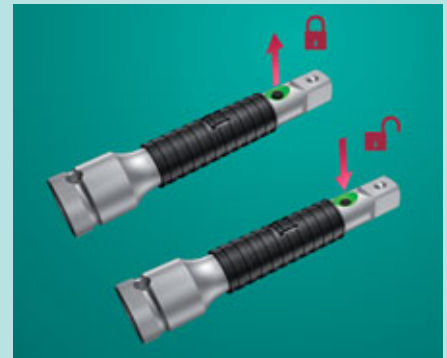

- All rigid Zyklop extensions are fitted with a freewheel sleeve. This sleeve lets you tighten and loosen screws and nuts quickly and effectively.

- The top line extensions are additionally fitted with the flexible lock system.

With this system activated, drive handles can be attached permanently to the extension, preventing loss and slipping.

When the system is deactivated the sockets can be attached as usual and changed in a flash!

From another angle...

- The wobble extension pivots through 15° in all directions. Enabling you to work quickly and precisely in concealed and cramped spaces.

Socket to me!

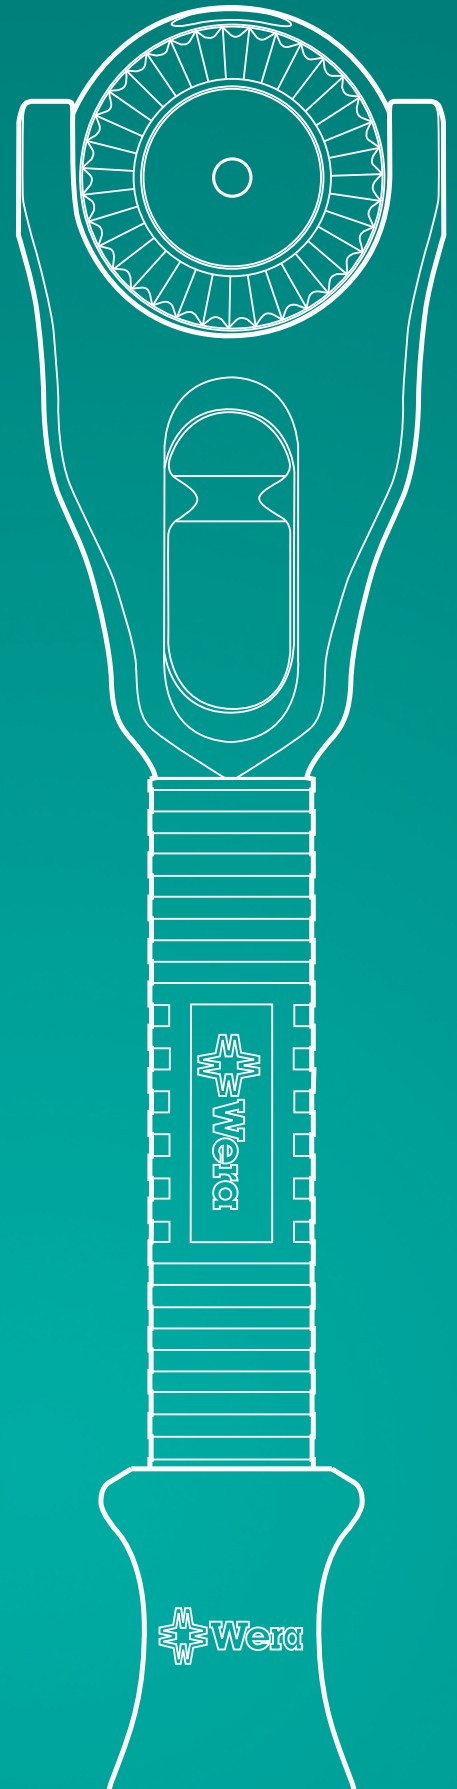

- Wera has developed its sockets accordingly to the latest industrial standards.
- The new manual and machine sockets can be used for both manual and machine work. (In most cases it is forbidden to use them with impact spanners). So no need for two sets of sockets!
- The knurling worked into the back end of the socket is ideal for manual applications. This position makes it easily accessible in every situation. In addition the groove presents a perfect mould for your fingers - for a good transfer of high forces. Reliable handling is also assured for work with oil.

Hard shell - soft core!

- Wera attaches great importance to the product design. In addition to the Zyklop ratchets themselves, the Zyklop ratchet boxes have been designed with attractive visual appeal. Manufactured from stable metal ideal for the workshop. The rubber feet hold them securely in place at the workplace.
- The tools are bedded in foam so that they can be carried safely and free of impacts. The dual colour foam insert helps you to sort the tools you no longer need quickly and reliably - missing tools are immediately recognised.
- Tool positions and attachments have been laser cut into the lid for easy legibility. You can find the tool you need with the minimum of effort.

1/4" drive

1/4" drive Zyklop ratchet 18 piece set - Metric

18 piece set In metal case with foam inlay

- 1 Zyklop ratchet with 1/4" drive
